WINNIPEG, MAN.

WHAT delight do you observe lovely fragrant flowers blooming indoors during the long months when the "Great Outdoors" is held tightly in the grip of King Frost. Then how pleasant are those fresh, delicately scented flowers that come early in the Spring in the garden, after a dreary winter, making the Home Grounds as attractive as do the Summer Flowers later.

You can enjoy these pleasures at the cost of a few Bulbs is small and the growing comparatively easy.

HINTS ON GROWING BULBS

IN THE OPEN GROUND—Start early and with good Bulbs—our quality is excellent. Light land is desirable, although any good garden soil will do. Prepare the soil thoroughly, and after planting at proper depth apply about 4-inch layer of manure to protect the bulbs from the alternate thawing and freezing during and at end of winter. Rake off the manure as soon as frost danger is over.

IN POTS INDOORS—Good, sound, matured Bulbs should be used; commence with Roman Hyacinths and Polyanthus Narciss for Christmas bloom. Follow with Dutch Hyacinths, Daffodils, Tulips, etc. Use sweet, fresh, porous soil, slightly damp. Plant so that soil is 1 inch below pot level when finished. This leaves room for watering. Be sure to cover the drainage hole with broken stone or crock before filling with soil. Keep in cool, dark place for about six weeks, giving water occasionally, after which they may be brought to light gradually in sitting room, etc.

IN CHINA BOWLS IN COMPANY—You may make use of china bowls, jardinières, etc., for Hyacinths, Daffodils, Narciss, Tulips and Crocus in our Bulb Compost without drainage. Same directions as in preceding paragraph, only Compost being used instead of soil.

Cultural Directions are Enclosed with Every Order

THE BULB SITUATION

This season we hope to fill all orders with those choice, large sized Bulbs of the finest quality that have given so much satisfaction to our customers in the past. This is the secret of our ever increasing volume of business in Fall Bulbs—we prefer quality to the cheaper grades that might fail altogether or give indifferent results.

Orders can only be accepted conditional on arrival of supplies. Send in your orders early. Any variety we are unable to supply you will be promptly notified and money refunded, as case may be.

We believe our bulbs should be ready round about the following dates:

September 15th—Lilium Candidum, Roman Hyacinths, Lilium Harrisii, Freesia, Paper White Narciss, Chinese Sacred Lilies.

September 20th—Hyacinths, Tulips and other Dutch Bulbs.

October 20th—Fall supplies of Lilies.

IMMEDIATE SHIPPING—Unless otherwise stated by our customers, we always forward such Bulbs as are ready on receipt of order, and the balance as fast as the different kinds arrive. Please inform us when ordering if other arrangements are desired.

RECEIPTANCE—All orders must be accompanied by cash to the full amount of the order, which may be sent by Post Office Order, Express Order or by currency in registered letter.

ADDRESS—Please write your Name, Post Office, Express Office and Province plainly. The clearer the instructions you are able to give us, the less chance there is of disappointment and errors in shipping.

Prices quoted herein are for the best stock procurable, conditional upon stock being unsold, and are subject to change without notice.

ROMAN HYACINTHS

The flowers, while smaller than those of the ordinary Dutch Hyacinth, are produced in much greater abundance—their delicious perfume, earliness and profusion of bloom have made Roman Hyacinths exceedingly popular. They are so easily grown and so early that, if potted in September, they can be brought into flower by Christmas (see cut).

Roman Hyacinths.

EARLY FLOWERING TULIPS

Tulips are universal favorites, and their ease of culture, combined with beauty of form and gorgeous coloring, renders them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. Letters and figures will be found marked against the following varieties. The letters refer to the season of flowering: varieties marked "a" being the first to bloom, and those marked "c" being last. The figures indicate the height of the plant in inches.

GIANT FLOWERING DARWIN TULIPS

The letters A, B, C, preceding the varieties, indicate their earliness of bloom. The A's flower earliest, B's next, etc.

Late Flowering Garden Tulips do not supplant early Tulips; for mixed gardens, herbaceous borders, sunny positions in proximity to shrubbery, etc.—where these late Tulips need not be disturbed—they prove a source of great satisfaction, being very hardy, continuing to grow, increase and flower for many years—conditions being at all congenial—many of the varieties having been collected from the cottage gardens of England, Scotland, Ireland, Flanders, etc., where they have been growing in some cases for fifty years. They should be planted an inch or two deeper than early Tulips, and best effects are secured by planting them in large clumps or groups. They may also be naturalized in the grass, wild gardens, etc.

FERTILIZERS

"STERLINGWORTH" PLANT FOOD TABLETS

Contains Nitrogen, Ammonia, Phosphoric Acid and Potash. A New Scenticide Odorless, Concentrated Fertilizer for Potted Plants. Takes the place of liquid manure. It starts the plants at once into healthy and vigorous growth, and makes them grow and bloom luxuriantly. Odorless, non-poisonous, non-injurious, clean and easy to handle. If your plants are not doing well, try Sterlingworth Plant Food Tablets, and see how quickly they are benefited. Trial size box, sufficient for 14 house plants for three months, 15c postpaid. Medium size box, sufficient for 15 plants for three months, 25c postpaid. Large size box, sufficient for 16 plants for eight months, 50c (postpaid 70c).

FERTILIZER FOR FLOWERS

May be either used dry or applied with water. If applied dry 2 or 3 ounces per square yard scattered over the soil will be sufficient. For potted plants, use according to size of pot, about $\frac{1}{4}$ to 1 level teaspoonful worked into the surface of the soil and then watered. If used in solution, 1 teaspoonful to one gallon of water, keeping well stirred, but taking care not to let any water come into contact with the leaves. Analysis, Nitrogen 3 per cent., Phosphoric Acid 5 per cent., Potash 5 per cent. Package 25c packed 3 lbs., by mail, add postage.

PURE FINE GROUND BONE MEAL

Ammonia 1 to 3 per cent.; Phosphoric Acid, 20 to 25 per cent. Our stock is known as Raw Bone Meal and is worth much more than the white, chalky-bone meal. This latter has most of the ammonia extracted, which reduces the fertilizing value. 5 lbs., 40c; 10 lbs., 65c; 25 lbs., \$1.20.

COLONIAL FERTILIZER

A very high grade manure, and excellent as a general Fertilizer for Vegetables, Roots, Lawns, etc. For broadcast sowing in garden or field from 400 to 450 lbs. per acre give good results. In improving lawns about $\frac{1}{2}$ ounce to a square foot sown when the grass is dry so that Fertilizer will not adhere to blades, will promote a quick, luxurious growth and a rich green color. When making a new lawn, use about 200 to 400 lbs. per acre, working well into the soil. This Fertilizer shows up well on analysis—Nitrogen 3 per cent.; Ammonia Equivalent 1.5 per cent.; Water-Soluble Phosphoric Acid 3.7 per cent.; Citric-Soluble Phosphoric Acid 1.4 per cent.; Available Phosphoric Acid 11.1 per cent.; Potash 4 per cent. Price 5 lbs., 40c; 10 lbs., \$1.00; 25 lbs., \$2.00; 50 lbs., \$3.75.

PULVERIZED SHEEP MANURE

A soluble plant-food highly recommended for all purposes where a first-class fertilizer is required. It is a pure natural manure, and has long been recognized as one of the most beneficial. As a top-dressing for lawns it is unequalled; also, for mixing with peatling soil. As a fertilizing agent for plants indoors and in the open garden, it is one of the very best. Price, 100 lbs., \$4.75; 50 lbs., \$2.50; 25 lbs., \$1.25; 10 lbs., 70c.
